**DETAILED ACTION*****Application Status***

The instant Office action is a supplemental restriction requirement. The previous Office action (Paper No. 6) was a restriction requirement of pending claims 1-61. Applicants stated that the claimed Groupings did not match the pending claim set and therefore, applicants did not respond with an election to a single invention and instead requested co-examination of all claims. The instant supplemental restriction requirement is at the discretion of the examiner (see MPEP 802 and 37 CFR 1.142) and is deemed appropriate and necessary in view of applicants' response and the confusing nature of the initial restriction of Paper No. 6.

Claims 1-61 are pending in the application.

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claim(s) 1-26, drawn to a method for identifying a bioactivity or a biomolecule of interest, classified in class 435, subclass 6.
  - II. Claim(s) 27, drawn to a method for identifying a polynucleotide encoding a polypeptide of interest, classified in class 435, subclass 6.
  - III. Claim(s) 28-52, drawn to a method for high-throughput screening of a polynucleotide library, classified in class 435, subclass 6.
  - IV. Claim(s) 53 and 54, drawn to a method of screening for a polynucleotide encoding an activity of interest, classified in class 435, subclass 6.
  - V. Claim(s) 55 and 56, drawn to a method for screening polynucleotides, classified in class 435, subclass 6.
  - VI. Claim(s) 57-61, drawn to a method for obtaining an organism, classified in class 435, subclass 30.
2. The inventions are distinct, each from the other because:

Art Unit: 1652

3. The methods of Groups I-VI are independent as they comprise different steps, utilize different products and/or yield different results.
4. Because these inventions are distinct for the reasons given above have separate classifications and/or each of the inventions listed as Groups I-VI requires a separate search, restriction for examination purposes as indicated is proper. "For purposes of the initial requirement, a serious burden on the examiner may be *prima facie* shown if the examiner shows by appropriate explanation either separate classification, separate status in the art, or a different field of search as defined in MPEP 808.02" (see MPEP 803). The inventions listed as Groups I-VI require divergent patent and non-patent literature searches, thus establishing the serious burden of search on the examiner.

### ***Conclusion***

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to David Steadman, whose telephone number is (703) 308-3934. The Examiner can normally be reached Monday-Friday from 7:30 am to 2:00 pm and from 3:30 pm to 5:30 pm. If attempts to reach the Examiner by telephone are unsuccessful, the Examiner's supervisor, Ponnathapura Achutamurthy, can be reached at (703) 308-3804. The FAX number for this Group is (703) 308-4242. Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Art Unit receptionist whose telephone number is (703) 308-0196.
